<b>Inhalation</b>	Immediate first aid is imperative. Loosen tight clothing such as collar, tie or belt. Maintain an open airway. Move affected person to fresh air at once. Place unconscious person on their side in the recovery position and ensure breathing can take place. When breathing is difficult, properly trained personnel may assist affected person by administering oxygen.
<b>Ingestion</b>	Rinse mouth thoroughly with water. Do not induce vomiting unless under the direction of medical personnel. If in doubt, get medical attention promptly.
<b>Skin contact</b>	Rinse cautiously with water for several minutes. Remove contaminated clothing. Wash contaminated clothing before reuse.
<b>Eye contact</b>	Remove contact lenses, if present and easy to do. Continue rinsing. Rinse immediately with plenty of water. Get medical attention if symptoms are severe or persist after washing.

### 4.2. Most important symptoms and effects, both acute and delayed

<b>Inhalation</b>	Symptoms following overexposure may include the following: Coughing, chest tightness, feeling of chest pressure. Drowsiness, dizziness, disorientation, vertigo. May cause discomfort. Central nervous system depression.
<b>Ingestion</b>	May cause discomfort if swallowed. Coughing, chest tightness, feeling of chest pressure. Liquid irritates mucous membranes and may cause abdominal pain if swallowed. Blindness.
<b>Skin contact</b>	Causes mild skin irritation. Prolonged contact may cause redness, irritation and dry skin. Overexposure may depress the central nervous system, causing dizziness and intoxication.
